

A Conference Management System

CSCI 2210 Spring 2026

Maya Garcia Schafer, Jillian Stork, and Jacey Tsosie

Description:

This program is designed to help manage the different aspects of planning and organizing conferences. The system manages speakers, attendees, rooms, schedules, and organizers. It tracks schedules, assigns speakers to rooms, and is designed to prevent overlapping conflicts across events to ensure smooth organization for the organizing committee.

Speaker:

- Can be assigned speaker role by organizer
- Assigned times to speak
- Assigned rooms to speak in
- Assigned topics to speak on
- Has a biography to inform attendees of their experience and expertise

Attendee:

- Store basic attendee information, including first and last name, email, organization, food preference, and job title
- Attends sessions it is registered for
- Assigns ID number

Room:

- Stores room details (conference name, capacity, and location)
- Checks for room availability
- Uses the schedule class for room assigning
- Different room types
 - Workshop
 - Party/special events
 - Training/lecture

Schedule:

- Entry should reserve allotted time for room, conference, and organizer.
- Organize time slots and is reserved by organizer
- Prevents booking conflicts
- Stores information about start and end time, dates, and rooms

Conference:

- Contains conference titles
- Stores the dates of the conference
- Categorizes conferences by topic
- Stores venue location
- Lists speakers, organizer, and number of attendees

Organizer:

- Assigns organizer an ID
- Requires authentication for organizers (username and password)
- Allows organizer to change current conference details
- Gives organizers ability to create and remove conferences
- Keeps track of and assigns roles, including speaker roles

Additional Entities:

- Equipment
 - Reservation for equipment needed for rooms
 - Includes projectors, laptops, big screens, microphones, etc.
 - Lists all equipment possible to reserve
 - Differentiates between reserved and unreserved equipment
 - Shows when reserved equipment will become available
 - Stores current location of equipment

- Prevents double-reservation of equipment
- Ticket reservation
 - Customers can purchase tickets
 - Organizers can upload tickets for attendees
- Catering Services
 - Option 1: breakfast: standard food items that the client selects
 - Option 2: lunch – wraps/sandwiches/beverage/chips/cookie
 - Attendees are able to choose meals for dietary restrictions
